## Experience Summary

Passionate and experienced software developer with a strong background in full-stack web development. Skilled in building and maintaining single-page applications using JavaScript and modern frameworks such as React. From early curiosity sparked by an Atari 2600 to a professional career in software engineering, I've always sought to understand and build better technology. My foundation in IT support makes me adaptable and quick to learn new technologies, with a focus on problem-solving, documentation, and collaboration in agile environments.

## Skills

- Excellent Google searching skills
- Team-oriented and highly collaborative
- Highly organized and detail-oriented
- Rapid learner of new tools and technologies
- Create Thorough Documentation
- Always learning/improving skills
- Excellent verbal communication skills
- Skilled at troubleshooting and debugging

## Tools and Technologies

- Hardware: IT support background
- Systems: macOS, Linux, Windows
- Development Tools: VS Code, Android Studio, Xcode, pgAdmin, Git, Bitbucket, Microsoft Teams, Slack
- Languages & Frameworks: JavaScript, TypeScript, Python, Java, React, React Native, Node.js, Express, Flask, Django, Swift, Kotlin
- DevOps & Workflow: Jira, Agile/Scrum methodology, sprints, CircleCI
- Other Tools: Microsoft Office, Google Analytics, HighchartsJS, Material UI

## Education

- Community College of Rhode Island
  - Associate of Science, May 2017

## Certifications

- CompTia A+

## Work Experience

### GDIT

**3/2024 – Present**

### Savannah, GA (Remote)

#### Software Developer Senior Advisor

- Developed and maintained full-stack applications for government clients using Python and JavaScript
- Implemented new features and resolved bugs in React-based single-page dashboards
- Participated in daily scrums and used Jira for agile project management
- **Technologies:** Python, JavaScript, React, Git, Jira, Microsoft Teams

### Warner Media

**3/2020– 3/2024**

### Atlanta, GA (Remote)

#### Software Developer

- Resolved bugs and implemented new features in products across Warner Media's portfolio
- Participated in agile workflows with daily stand-ups and sprint planning
- **Technologies:** TypeScript, JavaScript, Swift, Kotlin
